Migden Rescues Local Marin FM Radio Stations *At Senator's behest Comcast agrees to carry local stations*

San Rafael CA- State Senator Carole Migden (San Francisco/North Bay) announced that Comcast Cable has agreed to carry Marin County's three local FM stations on its public access television channels at times when the channels are not broadcasting video community programming. The three local stations are Radio Sausalito 100.1, KWMR West Marin 90.5, and San Rafael High School Radio 88.1.

In June, Senator Migden used the clout of her office to push Comcast Cable to unveil a plan to return FM radio to Marin County through a digital format. This package will provide 32 static free FM channels to local residents who are unable to receive traditional radio transmissions due to Marin's hilly topography.

Community members contacted Senator Migden over growing concern that the 32 channel lineup would not include Marin community radio. This compromise orchestrated by Senator Migden, will allow Marin residents to receive these stations on a part time basis.

"I want to thank Senator Migden for her leadership and support on this issue," said Jonathan Westerling, founder and President of Radio Sausalito.
